Steve -

I just checked with Andy Lincoff, our bac-t guy over at the lab. The appropriate test for shoreline seawater is enterococcus, with an average max of 35 per 100mL, or a "not to exceed" of 104 per 100 mL. Do you know what levels they've been finding?

Kathy, maps you'll need reflection City sampling points.

I'll ask her to include you on data dist.

Suggest (unless you already know) you chat with someone there who's familiar with bacteriologica criteria, yadda yadda. Something I have not had time to do. It's City's bag, but having a grounding on what data mean would be good.

*(See attached file: Waimanalo Gulch Sanitary Landfill Monitoring Stations (2).pdf)*

*(See attached file: Revised 92-460 Farrington Hwy-Waimanalo Gulch Landfill 15Jan2011.pdf)*

I'm informed to forward data to you. Attached, please find our sign and sampling maps.

Please note that, per instructions from Mike Tsuji, DOH, we are exchanging the "Upper Canyon" sampling site with another site. When the updated maps is available, a copy will be forwarded to you.

If there are any questions, please don't hesitate.[attachment "Waimanalo Gulch Sanitary Landfill Monitoring Stations (2).pdf" deleted by Katherine Baylor/R9/USEPA/US] [attachment "Revised 92-460 Farrington Hwy-Waimanalo Gulch Landfill 15Jan2011.pdf" deleted by Katherine Baylor/R9/USEPA/US]
